Audience

We anticipate an audience of approximately 100 people representing both the public and private sectors, academia and government. Conference participants are thought-leaders in the field of international development representing organizations that work in multiple countries around the world, practitioners who spend time in the field, researchers seeking solutions to global challenges grounded in science, and funders interested in investing for impact. We are closely following health & safety precautions, and will follow all guidelines recommended by state officials and Mcmenamins. While we cannot guarantee Oregon weather, we have chosen this year's location because of its access to outdoor space as an added safety precaution.
